

# Discrete Applied Mathematics

## Volume 154, Issue 18, 1 December 2006

### Contents

#### Contributions

- M. Brazil, D.A. Thomas and J.F. Weng*  
Locally minimal uniformly oriented shortest networks 2545
- B. De Schuymer, H. De Meyer and B. De Baets*  
Optimal strategies for equal-sum dice games 2565
- T. Dimitriou, S. Nikolettseas and P. Spirakis*  
The infection time of graphs 2577
- G. Gong and H.-Y. Song*  
Two-tuple balance of non-binary sequences with ideal two-level autocorrelation 2590
- F.R. McMorris, H.M. Mulder and R.C. Powers*  
The  $t$ -median function on graphs 2599

#### Notes

- J. Feng, S. Li and R. Li*  
An  $s$ -strong tournament with  $s \geq 3$  has  $s+1$  vertices whose out-arcs are 4-pancyclic 2609
- G. Gutin, T. Jensen and A. Yeo*  
Domination analysis for minimum multiprocessor scheduling 2613

#### Errata

- R. Hassin and S. Rubinstein*  
Erratum to "An approximation algorithm for maximum triangle packing"  
[Discrete Applied Mathematics 154 (2006) 971–979] 2620
- List of referees* 2621
- Forthcoming special issues* 2625
